

Valentin Guigon

Postdoctoral researcher in computational neuroscience, computational psychiatry, and NeuroAI

Social Learning and Decisions Lab, Department of Psychology, University of Maryland
College Park, Maryland, USA

vguigon@umd.edu · [website](#) · [github](#) · [linkedin](#)

RESEARCH INTERESTS

Themes Belief updating; information-seeking; social learning; metacognition; decision-making.

Disciplines Computational psychiatry; computational neuroscience; behavioral economics; NeuroAI.

Broader interests Public policy, epistemology, photography, and culture writ large.

ACADEMIC POSITIONS

Postdoctoral researcher · Social Learning and Decisions Lab

March 2024 – present

Department of Psychology, University of Maryland

College Park, MD, USA · Social learning · PI: Caroline Charpentier

Combining computational modeling with neuroimaging to investigate the neurocomputational mechanisms underlying neurotypical and neuroatypical learning in social contexts, and individual differences in dynamic belief updating during trust learning.

Lead development of lab-wide reproducible infrastructure for behavioral, fMRI, and model-fitting workflows, including shared pipelines, QC and reporting systems.

Research assistants: Joshua Berman, Atharv A. Umap, Gaurav D. Mahajan.

Postdoctoral researcher · Neuroeconomics

March 2023 – Oct 2023

CNRS UMR 5229, ISCMJ · CNRS UMR 5824, GATE

Lyon, France · Social decision-making · PIs: Marie Claire Villeval, Jean-Claude Dreher

Extended my doctoral work on the transmission of uncertain information to belief updating in social-network settings. The position centered on behavioral study design, implementation, analysis planning, and model-based interpretation of social influence and belief revision.

PhD researcher · Neuroeconomics

Oct 2018 – Dec 2022

CNRS UMR 5229, ISCMJ · CNRS UMR 5824, GATE

Lyon, France · Social decision-making · PIs: Marie Claire Villeval, Jean-Claude Dreher

Designed and analyzed behavioral and neuroimaging studies on how people seek, evaluate, and transmit uncertain information in social and economic environments. The dissertation developed links between metacognition, information seeking, belief updating, and inferences about others' preferences for information.

Research intern · Neuroeconomics Laboratory

Feb – July 2018

CNRS UMR 5229, ISCMJ

Lyon, France · Decision-making and reward processing · PI: Jean-Claude Dreher

Conducted functional-connectivity analyses of testosterone-induced effects on orbitofrontal-amygdala coupling during anticipation of primary and secondary rewards, using first-level and connectivity models for fMRI data.

Research intern · Neuroeconomics Laboratory

June – Aug 2017

CNRS UMR 5229, ISCMJ

Lyon, France · Decision-making and reward processing · PI: Jean-Claude Dreher

Contributed to fMRI analyses of rewarded tasks and to research and ethics protocols for a study on moral norms under tDCS-disrupted decision-making.

Additional early research experience

March – April 2016

CNRS UMR 7260; CNRS UMR & La Poste; CNRS UMR 7309

Vestibular cortex and complex-systems modeling; nudging for risky behavior and ecological transition; theory of mind and schizophrenia.

EDUCATION

- | | |
|--|------------------|
| <p>PhD in Biology, Cognitive Neuroscience
 Neurosciences and Cognition Doctoral School, Université Claude Bernard Lyon 1, France
 Dissertation: <u>Neurocognitive mechanisms underlying transmission of uncertain information in humans.</u></p> | <p>2018–2022</p> |
| <p>MSc in Cognitive Science
 Faculty of Psychology, Université Lumière Lyon 2, France</p> | <p>2016–2018</p> |
| <p>BSc in Physiology and Neuroscience, Cognitive and Adaptive Neuroscience
 Faculty of Sciences, Aix-Marseille Université, France</p> | <p>2015–2016</p> |
| <p>BSc in Psychology
 Faculty of Human Sciences, Aix-Marseille Université, France</p> | <p>2012–2015</p> |

TEACHING AND MENTORING

TEACHING

- | | |
|---|----------------------|
| <p>Instructor · NACS 645 Cognitive Science
 University of Maryland · 11 PhD students
 Course: <u>Foundational debates in cognitive science</u>. Topics: concepts, modularity, embodied cognition, cognitive architecture, methods, social cognition, intercultural cognition, cognitive systems, thinking, and NeuroAI.</p> | <p>Sept–Dec 2025</p> |
| <p>Instructor · Cortes Critical Thinking Summer School
 France · 20 students
 Course: <u>Information; Beliefs; Predictions.</u></p> | <p>July 2025</p> |
| <p>Instructor · SPM fMRI preprocessing and contrasts
 Université Claude Bernard Lyon 1 · 20 PhD students
 Course: <u>fMRI preprocessing and first-level modeling with SPM.</u></p> | <p>June 2023</p> |

Teaching assistant · Cognitive Psychology

Sept–Dec 2017, 2018, 2019, 2020

Université Lumière Lyon 2 · 6 × 40 students · Professors: François Osiurak; Gaën Plancher

Licence 1 and License 2 courses covering research methodology, experimental paradigms, emotions, working memory, executive functions, and language.

MENTORING

Research mentor · PhD student

Sept 2024–April 2025

University of Maryland · 1 student

Research mentor · Neurosciences Master 1

Jan–June 2023, 2024

Université Claude Bernard Lyon 1 · 2 × 3 students

SELECTED SKILLS

Modeling	Computational modeling and simulation; Bayesian statistical analysis and inference; reinforcement-learning, bayesian and decision-making models.
Methods	Experimental design; simulations; neuroimaging; tDCS; open-science and reproducibility.
Leadership	Project leadership; cross-disciplinary collaboration; teaching, mentoring, and scientific communication.

TOOLS AND METHODS

Authored software	neurodesign-plus (fMRI experimental-design optimization): PyPI ReadTheDocs
Programming	MATLAB, Python, R
Computational modeling	VBA toolbox, JAGS, BRMS, PyMC, Hugging Face
Neuroimaging	SPM, fMRIPrep, Nilearn, Fitlins, MRIcroGL, CONN

FELLOWSHIPS, AFFILIATIONS, AND SERVICE

Fellowships	LabEX CORTEX fellowship (2022–2023) LabEX CORTEX fellowship (2021–2022) IDEX INDEPTH PhD fellowship (2018–2021)
Affiliations	Affiliate, Artificial Intelligence Interdisciplinary Institute at Maryland (AIM), UMD (2024–present) Affiliate, Neuroscience and Cognitive Science program (NACS), UMD (2025–present) Full Member, Sigma Xi, The Scientific Research Honor Society (2026–present) Ambassador, Thinking About Thinking (2026–present)
Service	Cortex-magazine, editorial board member (January 2023–January 2024)
